

## About solving management problems

Adib Ben Jebara

Tunis, Tunisia Retired

**Abstract:** If we can consider management as applied mathematics and applied philosophy, we can go beyond capitalism. It can be noticed that religious people are not good managers because they think only of the very near future. Bad management is often done for political reasons such as electoral demagoguery. IF there will be less such reasons, everything will improve.

**Keywords :** Adib Ben Jebara; management problems; analysis of causes;

### I. Introduction :

Nowadays, the most urgent problems are management problems because the quality of management is low and the proof is the existence of widespread problems such as deficits and over-indebtedness.

Main text: There are a lot of problems not solved, that is why people, who can make intelligent efforts, are selected to be given diplomas.

However, people writing dissertations are encouraged to make comments about the ideas of others and not to try to introduce new ideas, except may be in the United States and in England.

The characters of the past who designed theories were good but did not provide us with anything which can be used like magic.

There is even that theory and practice are not linked enough. To tighten the link, motivations have to be more explicit on both sides.

If we can consider management as applied mathematics and applied philosophy, we can go beyond capitalism. Electricity distribution is a strategic activity in the competition between public sector and private sector, especially in the task of making plans which are not short term plans.

It can be noticed that religious people are not good managers because they think only of the very near future.

Managing activities from inventions is the good way to make a lot of money.

A lot of money from inventions is the good side of capitalism, side which does not exist in most countries.

One may become sick from trying to solve a problem but sickness is a temporary state and even chronic sicknesses can be half cured when "stabilized".

Medicine can change the features of an individual, even making him/her more deserving, which is rather

### II. paradoxical.

The first thing to do to solve a problem is to try twice because the people who thought that it might be hopeless were not idiots but they were not good at the analysis of causes.

In order to move toward problem solving, we should not judge according to prerequisites without direct links with the expected results.

Bad management is often done for political reasons such as electoral demagoguery. IF there will be less such reasons, everything will improve.

An example of bad management because of political reasons is not hiring skilled workers from outside the country or even the province.

### III. Conclusion :

If some new ideas do not solve problems, they are either not new enough or not very interesting. The problem of mistakes occurring can only be solved for 99% of cases at most.
