

## **SHORT COMMUNICATION About intellectual effort with references**

**Adib Ben Jebara**

Retired Tunis, Tunisia

**Abstract:** The brain is not the seat of intellectual activity but a gateway to the mind. If the mind has concern for the state of the gateway not having been under sufficient maintenance, it cannot concentrate on useful thoughts. Someone who passes to posterity may not get afterlife because afterlife is not for evil people. Animals cannot get infinite spiritual energy and therefore cannot get afterlife.

For solving problems by the analysis of causes, the annexation of part of the territory of politics to total quality management will happen sooner or later. To be a reformer, one needs a theory and to be a little a philosopher.

**Key words:** Adib Ben Jebara; American International Journal of Business Management

### **I. Introduction**

In physics, people make experiments and calculations without interpreting the results with some sound new theories. It is a physical effort with lack of intellectual effort. Even engineers do such things. In management, people want real time data to be spared any intellectual effort.

### **II. Main text**

A word may have a different meaning when used in a phrase and an intellectual effort is needed to know the meanings of phrases. Intellectual effort uses spiritual energy. I wrote about spritual energy in :

<https://www.aijbm.com/wp-content/uploads/2022/03/F534849.pdf>

I want to add :

The brain is not the seat of intellectual activity but a gateway to the mind.

If the mind has concern for the state of the gateway not having been under sufficient maintenance, it cannot concentrate on useful thoughts.

I want also to add :

Someone who passes to posterity may not get afterlife because afterlife is not for evil people.

Animals cannot get infinite spiritual energy and therefore cannot get afterlife. States pretend to encourage deep thinking but do not.

### **III. Conclusion**

For solving problems by the analysis of causes, the annexation of part of the territory of politics to total quality management will happen sooner or later. To be a reformer, one needs a theory and to be a little a philosopher.
