ABSTRACT

Shortcuts to development are an alternative to speeding up development (speeding up steadily). Delayed development comes from bad management rather than lack of speed. Even with the existence of shortcuts, to plan is important.

There is a problem of updates of software not bringing improvements.
The main goal should be the satisfaction of the user and not to show the skills.

Once a shortcut is found, it will provide an example of what can be done.
Speed carries risks of non quality.
Specificity of countries tend to decrease with the increase of exchanges of information influencing behaviors.

To do something outstanding, a theory is a shortcut because it is difficult to criticize.

In front of (when we face) complexity, there are shortcuts. The existence of shortcuts is a consequence of the existence of God. To know histories help to find shortcuts; to know where a doubt persists helps to find shortcuts.... [. . .]

This theory of shortcuts fits in the theory of total quality management.

II. MAIN TEXT

END OF QUOTATIONS

Shortcuts to development are an alternative to speeding up development (Speeding up steadily).

Delayed development comes from bad management rather than lack of speed.

Even with the existence of shortcuts, to plan is important.

Many lawyers think that procedures are more important than results and

Some lawyers seem not to know that laws are more important than Procedures.

There is a problem of updates of software not bringing improvements because of the goals not clear enough. The main goal should be the satisfaction of the user and not to show the skills.

III. CONCLUSION

Developing my philosophy helps me produce new ideas in total quality management which are not old ideas disguised as new ideas.

Some philosophy seems to reduce the audience (the audience of total quality management).

Once a shortcut is found, it will provide an example of what can be done.

Speed carries risks of non quality.

Specificity of countries tend to decrease with the increase of exchanges of information influencing behaviors.
