

Short communication about minds frozen

Adib Ben Jebara

Retired Tunis, Tunisia

Abstract: People are not doing analysis of causes of problems because their minds are frozen. Their minds are frozen because of the absence of freedom of speech. The idea that religious texts are never obsolete and cover everything is one of the causes of the absence of freedom of speech. There is also the absence of any kind of expertocracy except for experts in demagoguery. People want to dash towards solutions without taking the time to understand where the problems come from. People prefer to use their bodies than their minds.

Key words: “Adib Ben Jebara

I. INTRODUCTION

People are not doing analysis of causes of problems because their minds are frozen. Their minds are frozen because of the absence of freedom of speech. The idea that religious texts are never obsolete and cover everything is one of the causes of the absence of freedom of speech. There is also the absence of any kind of expertocracy except for experts in demagoguery.

II. MAIN TEXT

There is not even some kind of meritocracy. That we live in democracies is a lie as power belongs to minorities. except when referendums are held. The freezing of minds is made more serious by the lack of education and the lack of a number of experiences. Anti-intellectualism is a cause of frozen minds. Minds frozen are the cause of lack of flexibility. One of the reasons of bad results is often a lack of thinking. My research is there to prove that a lot of thinking could be there most of the time.

A lot of people think of themselves as just doers and don't think they have to have opinions. Google gives as one meaning of bureaucracy :: “excessively complicated administrative procedure”,

It should be underlined that bureaucracy is not result oriented. We are in the Age of combining symbols or words without much thinking.

People want to dash towards solutions without taking the time to understand where the problems come from. People prefer to use their bodies than their minds.

III. CONCLUSION

There may be several different solutions to a problem with some solutions better than others. For instance solutions for a deficit of budget may be borrowing or control of spending or increase of income. There should be higher education for all people but capitalism and over-population do not allow. People tend to use slang when they do not have enough access to education. When wealth increases, research budgets should increase accordingly. We are waiting for the thaw of minds (Resumption of activity; recirculation, unblocking), that could prevent a disaster from the physical climate change. That time is needed for solving problems means that God is not all powerful. There are no new important ideas in Marxism since more than 80 years ago.

Eventually and ultimately problems will be solved but with what casualties in the meantime ?

For civilizing people, schooling does not have enough results because a lot of time.

The main trend of History should be to produce enough goods so that activities of mind are possible for a great number of people.
