

Short Communication Summary of A Philosophy

Adib Ben Jebara

Retired Tunis, Tunisia

ABSTRACT

Thoughts are mathematical waves which remain existing an infinite time.
In the afterlife there are souls and not bodies.
To access the afterlife, an infinite spiritual energy is needed and provided by a connection to the Good if any.
Souls who fail to get the spiritual energy remain confined.
Matter has always existed and God exists as there are not always chaoses but only sometimes.
Religious texts are wrong about the creation of the universe because there existed previously another universe.
Nowadays philosophy tend to be taught only to specialists.

Key words: “Adib Ben Jebara

I. INTRODUCTION

Thoughts are mathematical waves which remain existing an infinite time.
In the afterlife there are souls and not bodies.
To access the afterlife, an infinite spiritual energy is needed and provided by a connection to the Good if any.
Souls who fail to get the spiritual energy remain confined.
Matter has always existed and God exists as there are not always chaos but only sometimes.
Religious texts are wrong about the creation of the universe because there existed previously another universe.
Nowadays philosophy tend to be taught only to specialists of philosophy and the specialists are even extremely specialized in some point of view.

II. MAIN TEXT

Afterlife is another universe with a parallel time, prophets accessed it before death by thought.
Things happen there first thing first without waiting for a judgment Day.
People were not told the truth because they were not able to understand it.
The brain is not the seat of the mind but the gateway to the mind.
People have to use more their mind and less their body to prevent more climate change.
When someone does a good work, it can be considered as a good deed.
God is not all powerfulness and that may be not a lack of perfection, it depends on what does perfection mean.
For perfect, Google gives as meaning “having all the required or desirable elements, qualities, or characteristics; as good as it is possible to be.”

III. CONCLUSION

There is a research in mathematics which must be done about what I called extrapolation principle which is in number theory not unlike the point at the infinite of Desargues in geometry.
There was a quiet revolution with intellectual workers working more hours almost each day.
Religions are made obsolete by schoolings.
A philosophy is needed to notice that not enough importance is given to theoretical knowledge.
A philosophy is needed to understand the behavior of elementary particles of physics.
That the same lessons are given in universities all over the world is a major mean for development and it is not enough the case.
If a basis was given by lessons, one would study further by himself/herself.
