### ABSTRACT

Nowadays politicians do not have any theories.

People think that afterlife is for the satisfaction of the body while it is for the satisfaction of the mind.

People tend to think that studies are to teach hard work and not the classics.

People who did not digest well the classics write opinions far from the truth and take decisions not appropriate.

A philosophy about problems may be a little difficult to understand (with its link to total quality management).

Nowadays people try to hide that philosophy is useful to people

Who try to make discoveries including in physics of particles.

**Keywords:** “Adib Ben Jebara”

### I. INTRODUCTION

Nowadays politicians do not have any theories.

People think that afterlife is for the satisfaction of the body while it is for the satisfaction of the mind.

People tend to think that studies are to teach hard work and not the classics.

People who did not digest well the classics write opinions far from the truth and take decisions not appropriate.

A philosophy about problems may be a little difficult to understand (with its link to total quality management).

Nowadays people try to hide that philosophy is useful to people Who try to make discoveries including in physics of particles.

In:

Short Communication Summary of A Philosophy

<https://www.aijbm.com/wp-content/uploads/2023/03/D632729.pdf>

I wrote:

Thoughts are mathematical waves which remain existing an infinite time. In the afterlife there are souls and not bodies. To access the afterlife, an infinite spiritual energy is needed and provided by a connection to the Good if any. Souls who fail to get the spiritual energy remain confined. Matter has always existed and God exists as there are not always chooses but only sometimes. Religious texts are wrong about the creation of the universe because there existed previously another universe.

Nowadays philosophies tend to be taught only to specialists of philosophy.

### III. CONCLUSION

Let us be reminded that important problems are anti-intellectualism, bureaucratic behavior, extreme specialization and being not result oriented.

There is homogenization in the world in potential of production with the Western World stepping back. One has to admit that living in a “developed country” has advantages in comparison with living in a non-developed country therefore economy is important.
