ABSTRACT

I think that publishing with internet is about three times quicker than without internet and there are about four times more readers with a web page.

The invention of internet in 1982 was made possible by a process which began with the invention of the telegraph in 1844 in the United States.

Like with word processing with files saved productivity is boosted by using internet for gathering information. The problems with internet are the incidents difficult to explain especially when the incidents are not serious.

I. INTRODUCTION

I think that publishing with internet is about three times quicker than without internet and there are about four times more readers with a web page.

The invention of internet in 1982 was made possible by a process which began with the invention of the telegraph in 1844 in the United States.

Like with word processing with files saved productivity is boosted by using internet for gathering information.

The problems with internet are the incidents difficult to explain especially when the incidents are not serious.

II. MAIN TEXT

Let us be reminded that the first personal computer appeared in 1976 and Google was launched in 1998.

A search engine is a powerful tool as it can detect it when a word is misspelled.

The slightest error in an email address compromises the execution of the sending.

Some Artificial Intelligence would be useful with email addresses lists.

Fortunately, from the law of conservation of matter-energy in physics, any writing can be not lost.

Internet can help fight extreme specialization.

Internet can help find where research is missing.

Covid-19 crisis made admitted the possibility of a lot of work at a distance using word processing and internet.

A misfortune was good for something.

III. CONCLUSION

Digitalization of documents for using internet has a lot of advantages

With the disadvantage that there could be more frauds;

There are too many scams using internet from all parts of the world.

Next we will be interested in the different philosophies of mathematics which are least Platonism, Logicism, Intuitionism, and Formalism **and we will look for help from the internet to write on them.**
